

TIMKEN LEATHER WHEEL END SEALS

TIMKEN

Timken. A long-standing brand trusted by fleets because we understand commercial vehicle applications and the value of uptime. Your confidence is our commitment, providing products with reliable operation and outstanding performance designed to **MAXIMIZE FLEET UPTIME, OPERATIONS AND YOUR BOTTOM LINE.**

A Rugged Durability: Oversized double-walled metal outer diameter helps prevent the seal from spinning or walking out of the hub bore (includes black bore sealant). Heavy-duty construction enables effective heat transfer away from the sealing lip.

B Impressive Adaptability: Severe service sleeve provides a new running surface for worn or damaged axle spindles and protects the spindle from damage during hub removal. Standard service sleeves also are available.

C Innovative Protection: Lay down polymer-impregnated leather lip absorbs grit and provides protection across a broad temperature range (-65°F to 170°F [-55°C to 77°C]). Outperforms nitrile seals in cold, contaminated environments and are compatible with all natural and synthetic oils and greases.

Stronger Value: Designed to meet or exceed the features of major industry competitors.

Simplified Installation: Steer, drive and trailer axle seals are available with tools designed to simplify accurate installations (Timken commercial grade tools or the Timken Insta-Tool®).

Visit www.timken.com/cvwarranty for CV Wheel End Components Warranty information.
